

On the Subject of Not Adjacent Letters

That's weird. The buttons on this Adjacent Letters are all pressed and they seem to be stuck. Also I can peel the labels off...

- When you click the Submit button, this module will check your submission exactly as if it were an [Adjacent Letters](http://ktane.timwi.de/HTML/Adjacent%20Letters.html) (<http://ktane.timwi.de/HTML/Adjacent%20Letters.html>) module.
- Since all the buttons are pressed, don't press submit until having all the buttons pressed IS the correct answer!
- To swap two labels, merely click the buttons in succession - the first selected button will light up and can be deselected by clicking it again.
- Press Submit to submit your answer.

Letter	Left/right	Above/below
